ATMIA United States (USA) Industry Defense Fund Value Proposition

To establish a US industry defense fund to be used by ATMIA's Government Relations Committee (GRC) to cover the costs of lobbying and monitoring various state and federal authorities regarding any proposed legislation which could adversely affect ATM businesses and the industry as a whole.

Such a fund will be properly registered and audited as part of the ATM Industry Association's annual audit and will be managed in a transparent way by the Government Relations Committee, reporting to the Executive board of ATMIA. All contributors and sponsors of this fund will have the option of being part of the voting process within the GRC for approving disbursements from the fund. In addition, contributors and sponsors of the fund will receive public recognition in ATMIA newsletters, press releases and announcements at annual US conferences as well as on a special webpage on which their logos and links will be showcased. ATMIA USA Industry Defense Fund Value Proposition.
