

ATMIA encourages members to serve on a variety of U.S. committees and offer your voice and ideas for the betterment of the industry. With the exception of the U.S. Regional Board of Directors, participation in committees is open to all U.S. members. Each committee typically meets quarterly for one hour by conference call or webinar. To join any of these committees, contact [David Tente](#), ATMIA U.S. Executive Director, or [Sharon Lane](#), Global Director, Finance & Member Services.

US Regional Board

Organizations that join ATMIA at the Board Level automatically become members of their regional board. The Board meets four times a year and is responsible for guiding chapter activities. One or more associates from each company may participate. Contact [Sharon Lane](#) for more information about Board Level Membership.

US Government Relations Committee (GRC)

The GRC serves as a forum for member organizations that are affected by government regulation at the local and national levels. Members share ideas and experiences regarding how best to deal with new legislation and compliance requirements. It is also a vehicle for advocacy.

Independent ATM Deployer (IAD) Committee

This committee brings together organizations that independently deploy, operate and manage ATMs, as well as those which provide them with products and services. Non-bank ATM operators face unique challenges in the marketplace and have an opportunity here to stay informed and network with peers.

Financial Institution ATM Deployers Forum

Most financial institutions (FIs) belong to state and/or national associations that are heavily involved in banking issues and related regulatory concerns. However very little focus is given to the ATM channel. ATMIA created the FI ATM Deployer Forum as a non-competitive environment in which banks and credit unions can share experiences and address issues unique to their ATM channel. **Must be with a financial institution to join*

Sponsoring Financial Institutions (SFI) Committee

The mission of this committee is to provide a forum for the discussion of risk associated with ATM IAD sponsorship and, with advice from networks, processors, IADs and other industry experts, to determine by consensus the procedures sponsoring financial institutions will recommend their institution implement. **Must be with a sponsor bank to join*
