ATM pooling in the Netherlands

ATMIA – Rome (October 15–17, 2019)

Roel van Anholt Head of Services Office

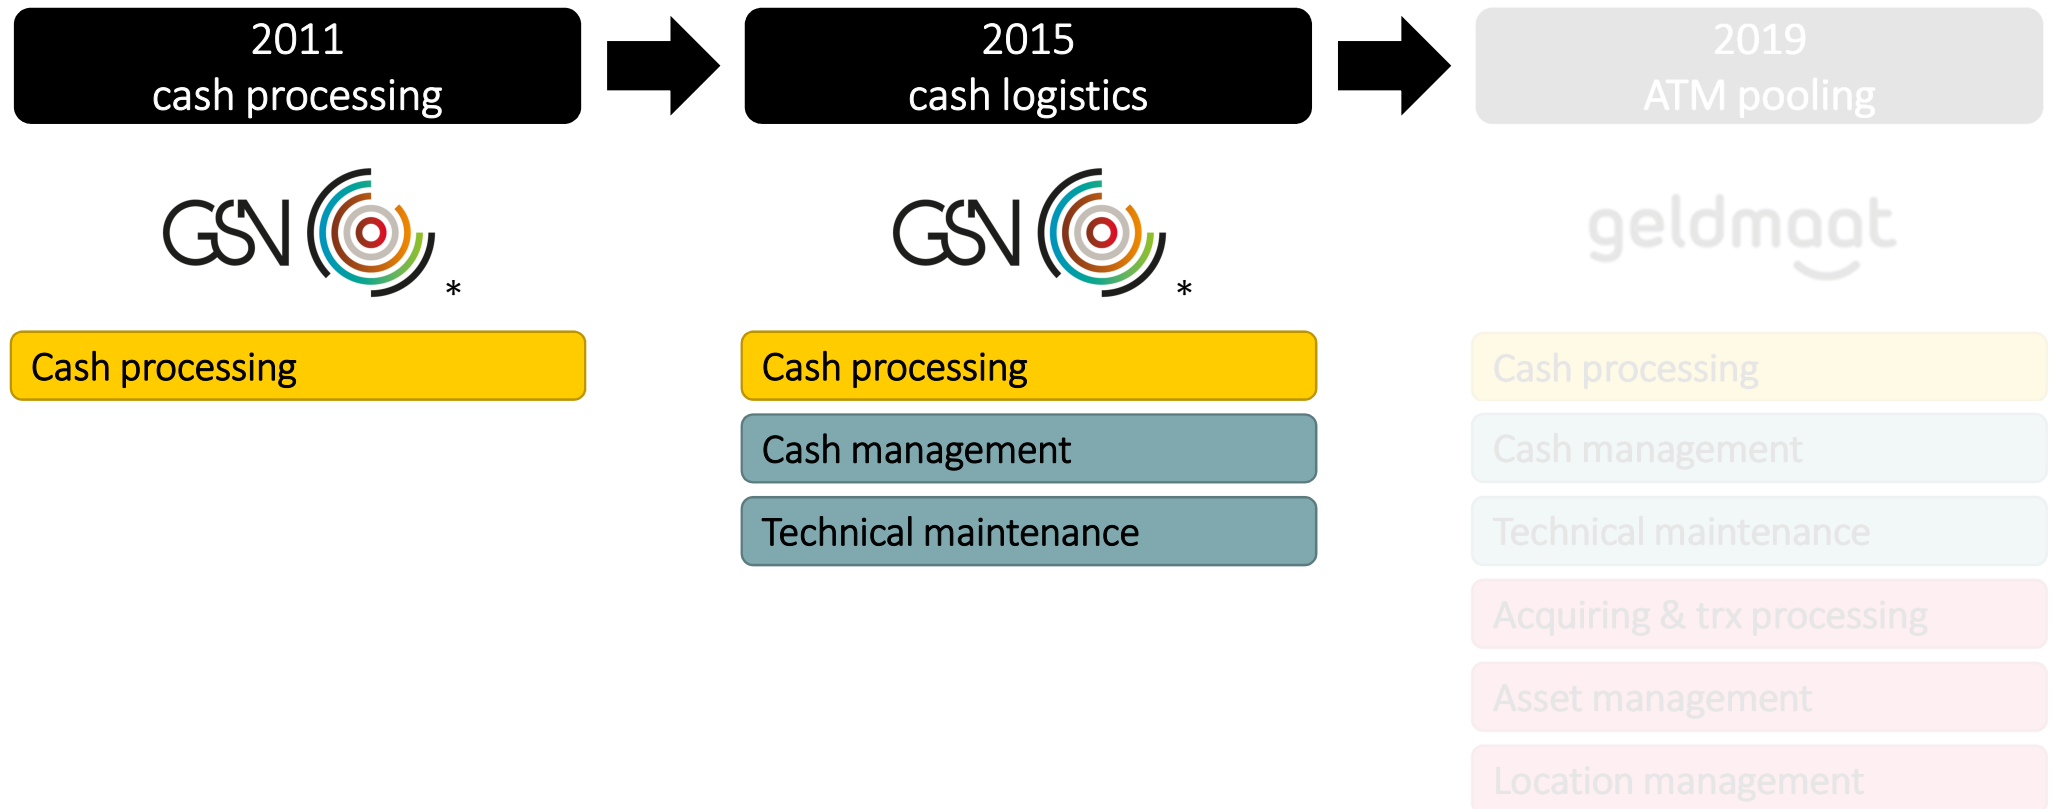

Paul Marselis Strategy & Business Development

geldmaat

The Netherlands: a densely populated, developed country

Past: Geldmaat expanded its activities since its founding

* GSN = Geldservice Nederland before the re-branding to Geldmaat

Cash trends in the Netherlands

Netherlands: the number of cash payments (*1 bln) at POS is in decline

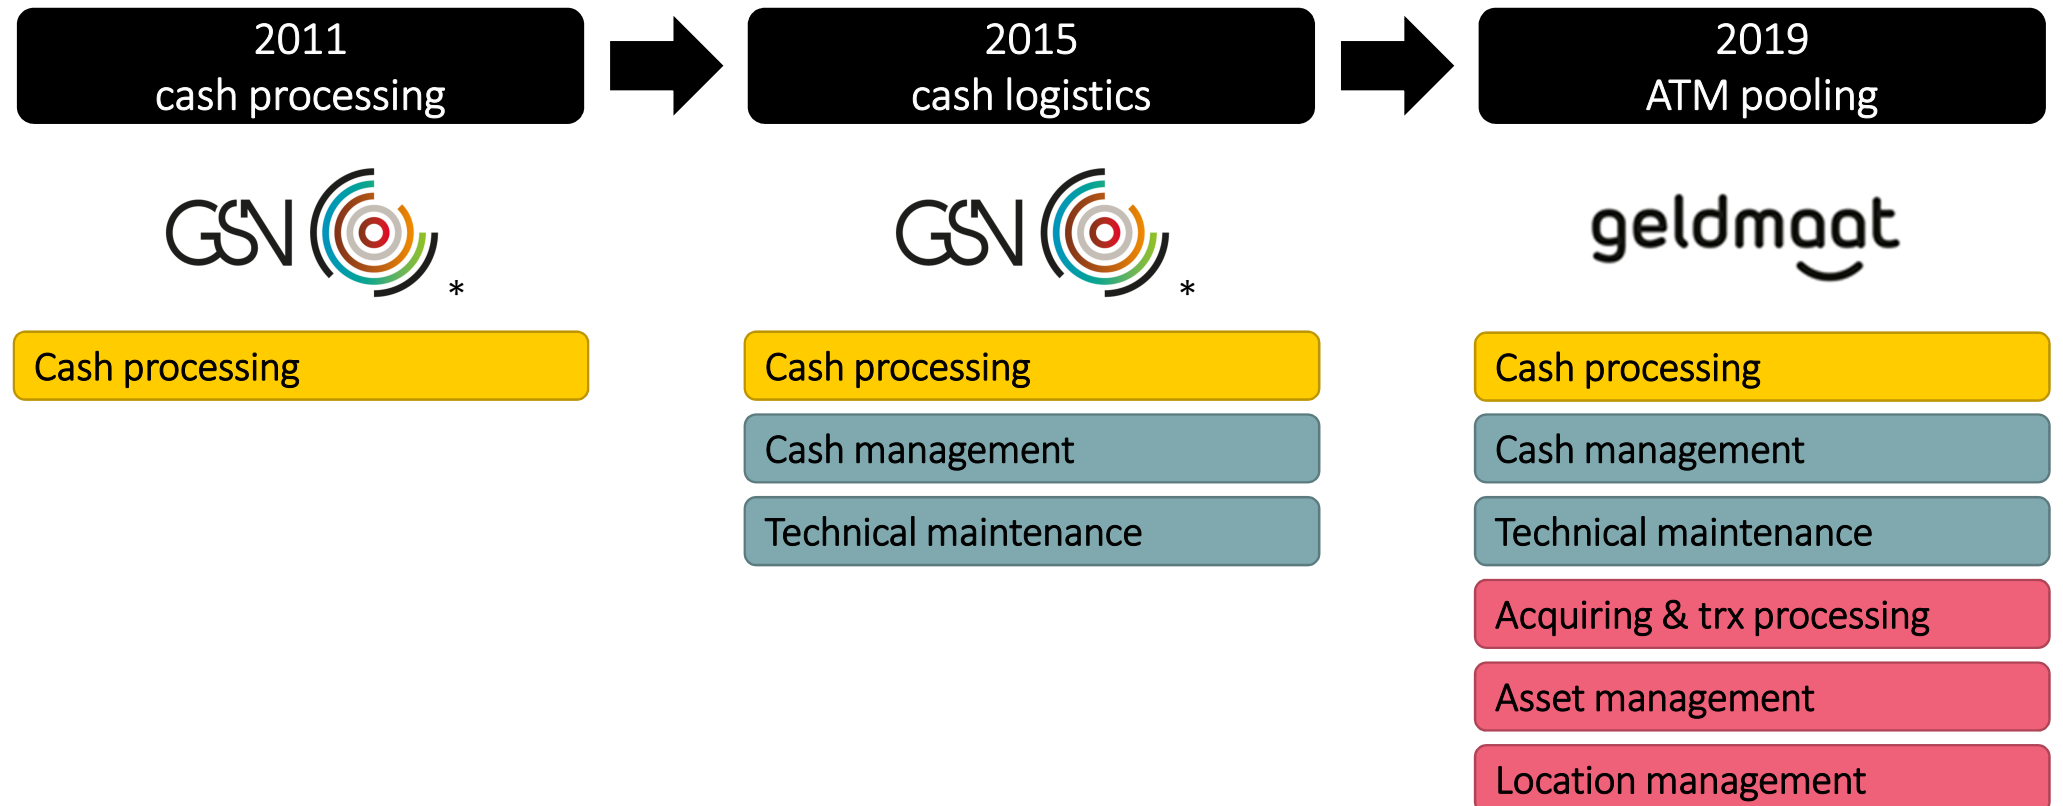

Geldmaat: the number of withdrawals at ATMs & processed notes at cash centers (*1 mln) in decline

European countries show various trends in the number of cash withdrawals (index 2008)

Source: European Central Bank

Present: Geldmaat gradually evolves into an ATM pooling company

* GSN = Geldservice Nederland before the re-branding to Geldmaat

ATM pooling ≠ independent ATM deployer

Geldmaat = ATM pooling

Independent ATM deployer

Bank owners

Non-bank owners

Commercially motivated

Why ATM Pooling?

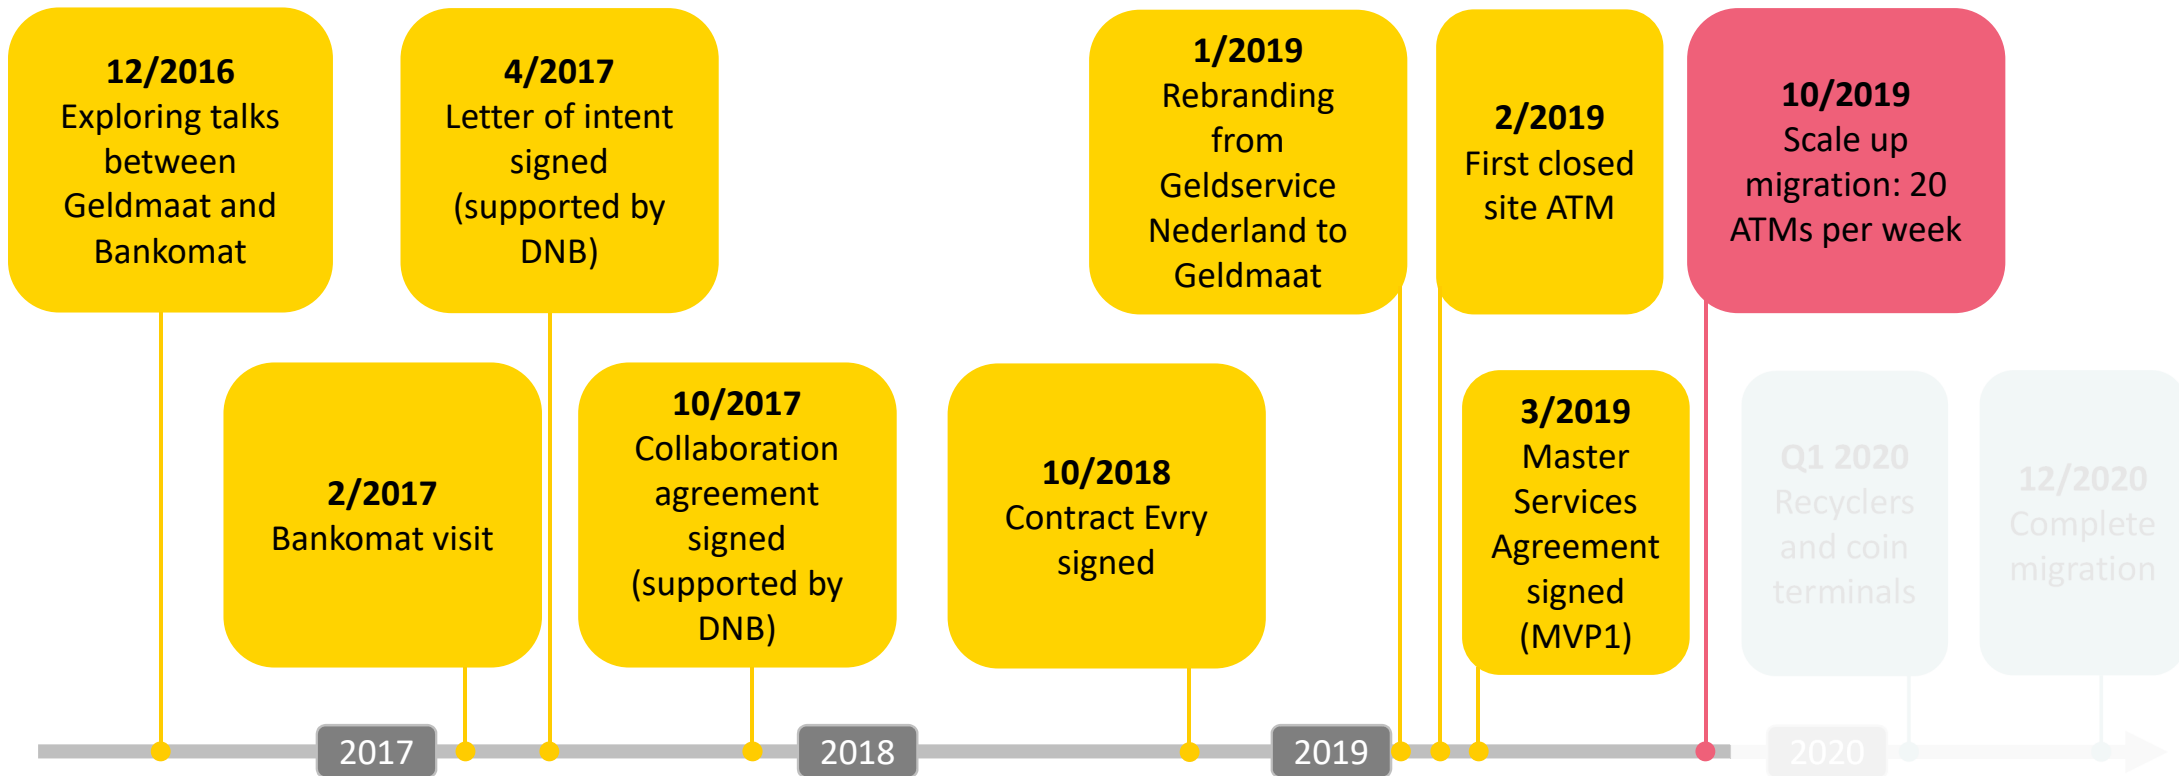

- ATM Pooling = consolidation in the foreground
- Positive effects are temporary

Rendering: Geldmaat in the streets

ATM pooling key milestones

What does ATM pooling bring to end-users

- End-users are offered a standardized, easy-to-use service
- Number of deposit (recycling) terminals doubles
- Everyone has access to an ATM within a 5km distance
- High ATM-uptime due to a new processing platform
- A new security standard
- Assisted service at retail locations
- Transactions remain affordable

Lessons learned so far

➤ Keep momentum (in beginning)

➤ Governance structure focused on vivid decision-making

➤ Design one new standard (plug) and let each bank connect to the standard (socket)

➤ Make sure the end-state ATM-network is designed before you start migrating

➤ Make sure you have the details of all hardware being migrated

➤ Try to get rid of legacy quickly: this is the time to build a new foundation

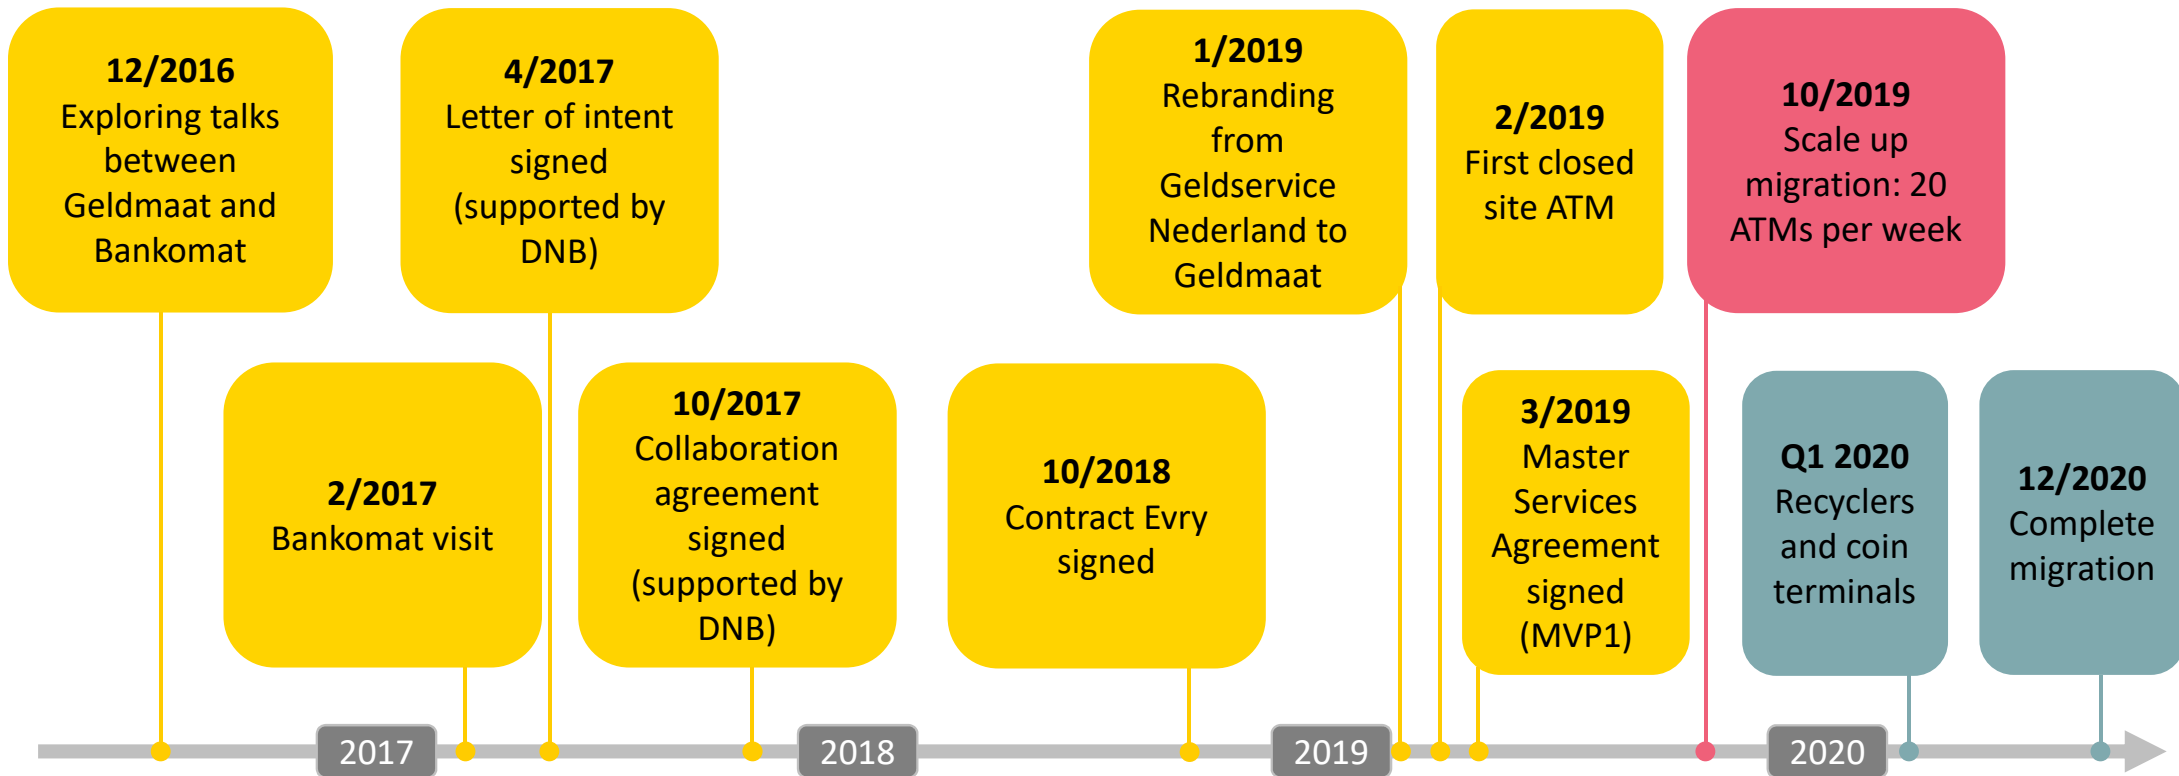

➤ As pooling company your focus should be on seamless integrating of vendor products/services

➤ Be aware of mixed interests of all parties involved to avoid slowing down during migration

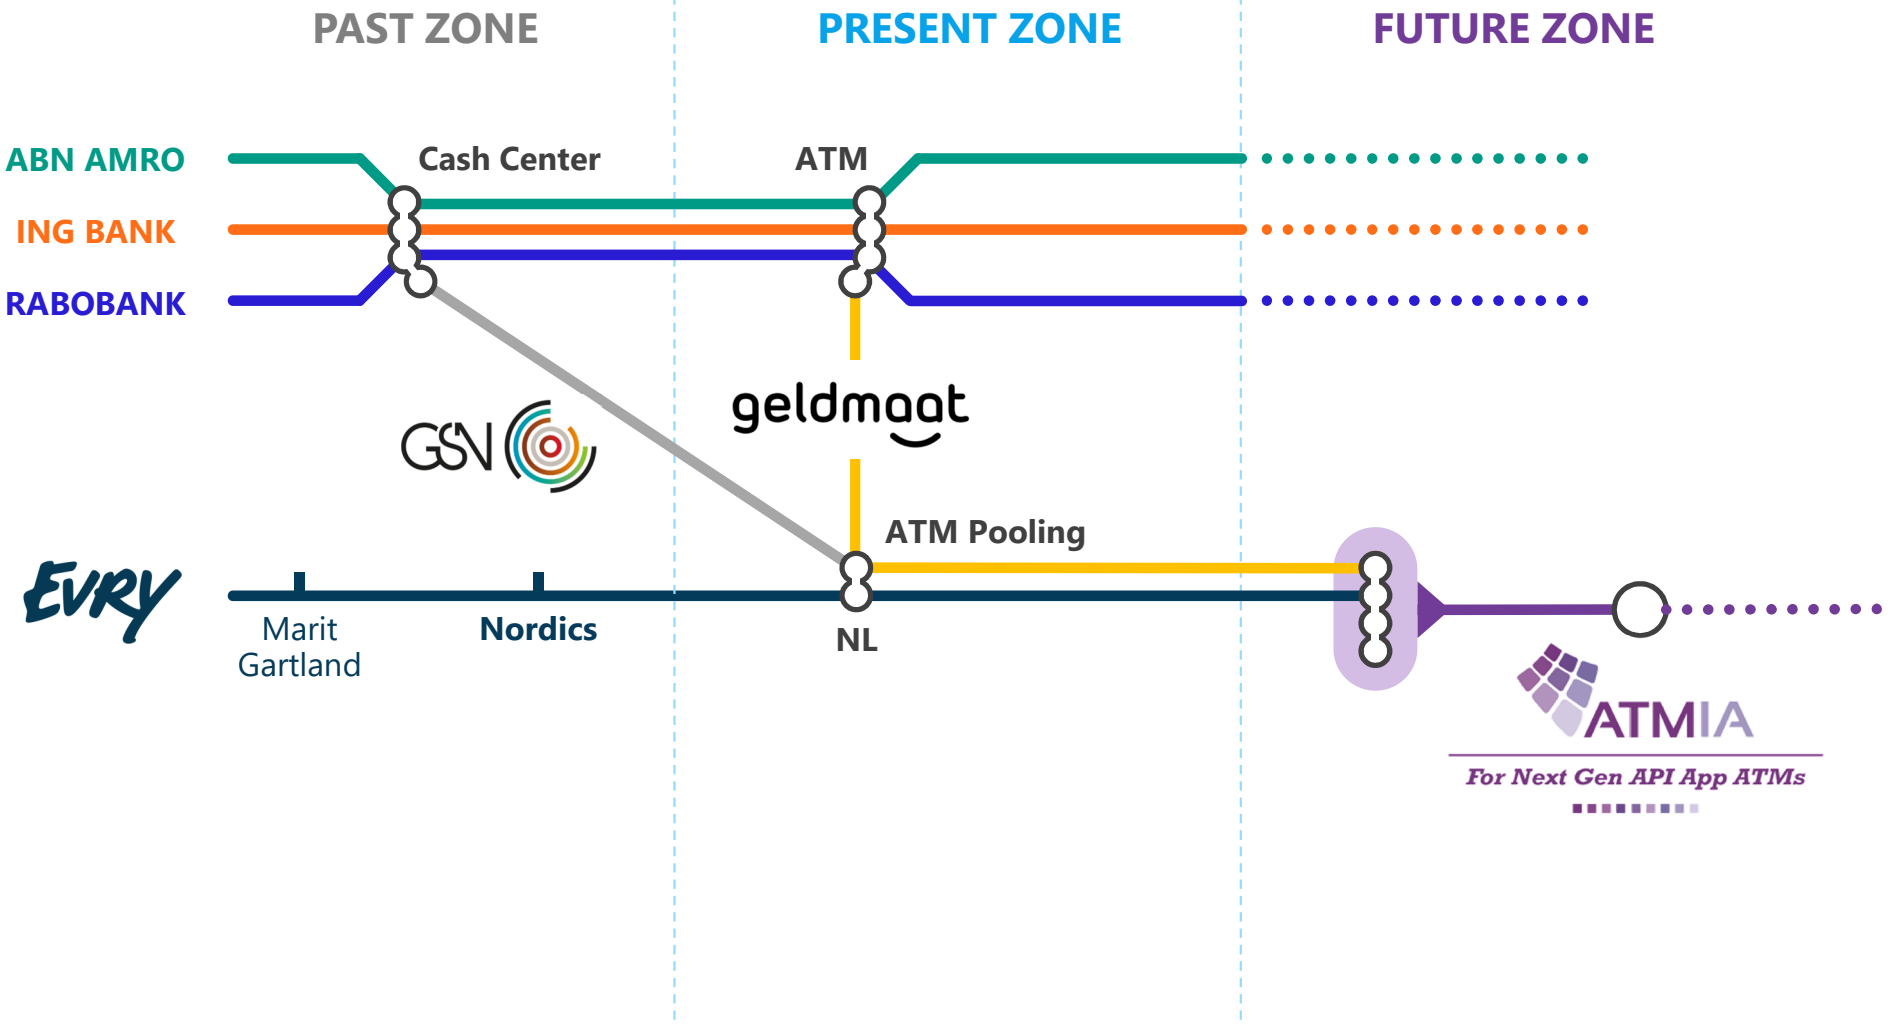

➤ 'Minimum viable product' approach works

ATM pooling key milestones

Voxvote Question #2

Why would banks participate in an ATM pooling initiative?

EVERY ATM Services

ATMIA – ROME (OCTOBER 15–17, 2019)

MARIT GARTLAND HEAD OF STRATEGY AND BUSINESS DEVELOPMENT

The logo for 'EVERY' is written in a white, stylized, handwritten-style font. The letters are slightly slanted and have a casual, modern feel. The 'E' and 'V' are particularly prominent with their unique shapes.

Industry #1 - Mobile - Open Handset Alliance Vision

- 11 years ago...the feature phone was considered “state-of-the-art”
- What would it take to build a better mobile phone - a “smart phone”?
- A commitment to **openness**, a **shared vision** for the future, and concrete **plans to make the vision a reality**
- Welcome to the Open Handset Alliance™, a group of 84 technology and mobile companies who have come together to **accelerate innovation** in mobile and offer consumers a **richer, less expensive, and better mobile experience**
- Together we have developed Android™, the first complete, open, and free mobile platform
- We are committed to commercially deploy handsets and services using the Android Platform

The Android logo, consisting of the word "ANDROID" in a stylized, blue, sans-serif font.

Industry #2 – Oil/Gas - OPAF Vision

- A standards-based, **open**, **secure** and **interoperable** process control architecture which:
 - Enables access to a **leading-edge capability**
 - Allows integration of **best-in-class components**
 - **Preserves asset** owners' application software; Significantly **lowers cost** of future replacement
 - **Promotes innovation and value creation**
 - Applies across multiple process industries
 - Is commercially available
 - Is an inclusive **collaboration** between users and suppliers to provide the framework for an **open systems** architecture innovation and value creation

Industry #3 – ATM – NextGen ATM Vision

- Just like mobile and oil/gas, this trend is happening in auto, aerospace and defense, and other industries
- The ATMIA can learn from this
- The NextGen ATM is travelling down a similar path

One Unofficial Vision of the NextGen ATM

- **Open** – less vendor lock-in, more easily customizable, better interoperability
- Accelerated **innovation** will result in new **value creation**
- **New customer features** – mobile interface, micro services
- **Richer operator features** - app stores, improved software deployment, improved security, leading edge capabilities like orchestration
- Improved **preservation of assets** (a support cycle that matches typical ATM life)
- New level of industry **collaboration**
- Life in the fast lane – everything starts **moving more quickly**
- Less expensive? Time will tell...
 - There will be **new revenue generation opportunities**

VoxVote Question #4

- How far along are you with the Windows 10 migration?
 - Under Research
 - Preparing
 - Business Case
 - BC Approved & Planning
 - Currently Migrating
 - Migrated to Windows 10

VoxVote Question #5

- Have you heard about hypervisors before?
 - Yes
 - No

Hypervisor

- A hypervisor is software that allows one or more operating systems to run at the same time on the same hardware
- Or, a hypervisor is software that separates a computer's operating system and applications from the underlying physical hardware
- It's a form of virtualization software
 - This happens through the creation of virtual machines - Host OS & Guest OSs
- Why we should embrace hypervisors...
 - To take a new OS (like Windows 10) and support it on old hardware (like your old Intel Motherboard)
 - To allow co-existence and isolation of multiple OSs/applications (ATM financials in one virtual machine and new micro-services / applications in another)
 - Allows faster software upgrades and less ATM downtime

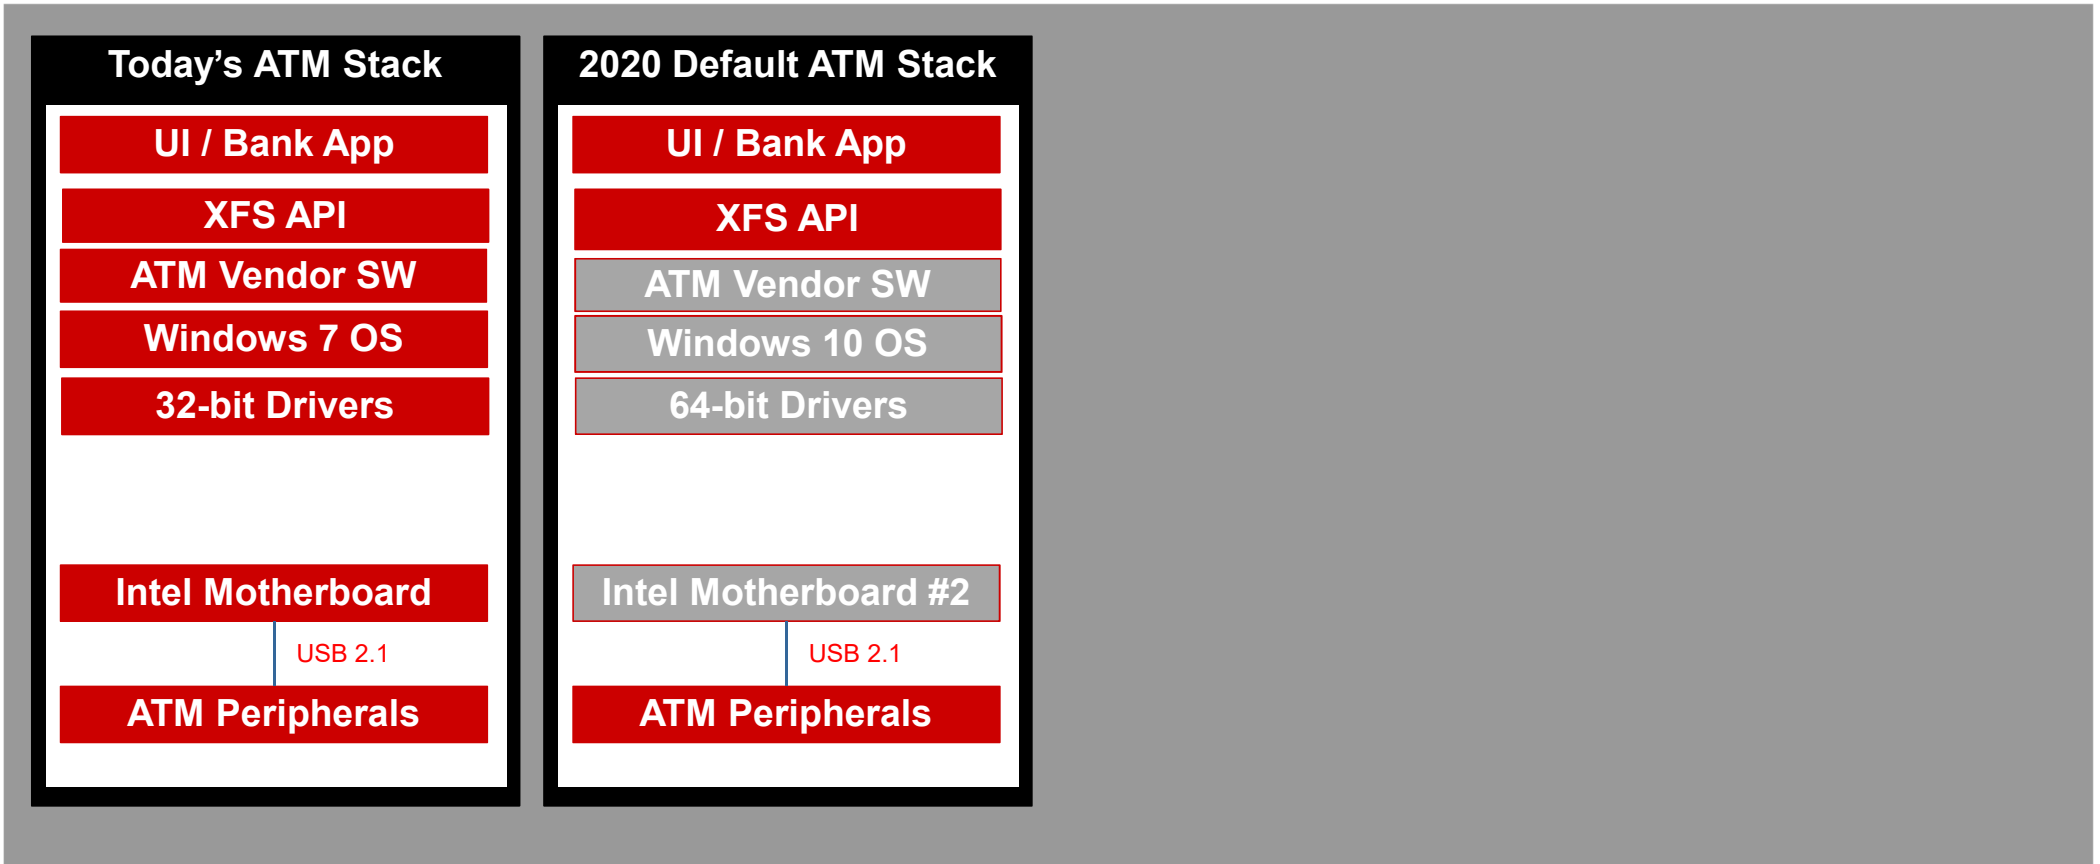

What can we do today?

- Wind River introduced the hypervisor concept to ATMs
 - Solutions up and running on a few NCR and Diebold ATMs
 - Added Linux + Hypervisor between the HW and Windows OS
- Today's challenge – ATM provider support
 - Need to convince ATM vendors to take a look at Hypervisors as a potential technology solution
 - Make your voice heard - Talk to your ATM provider!

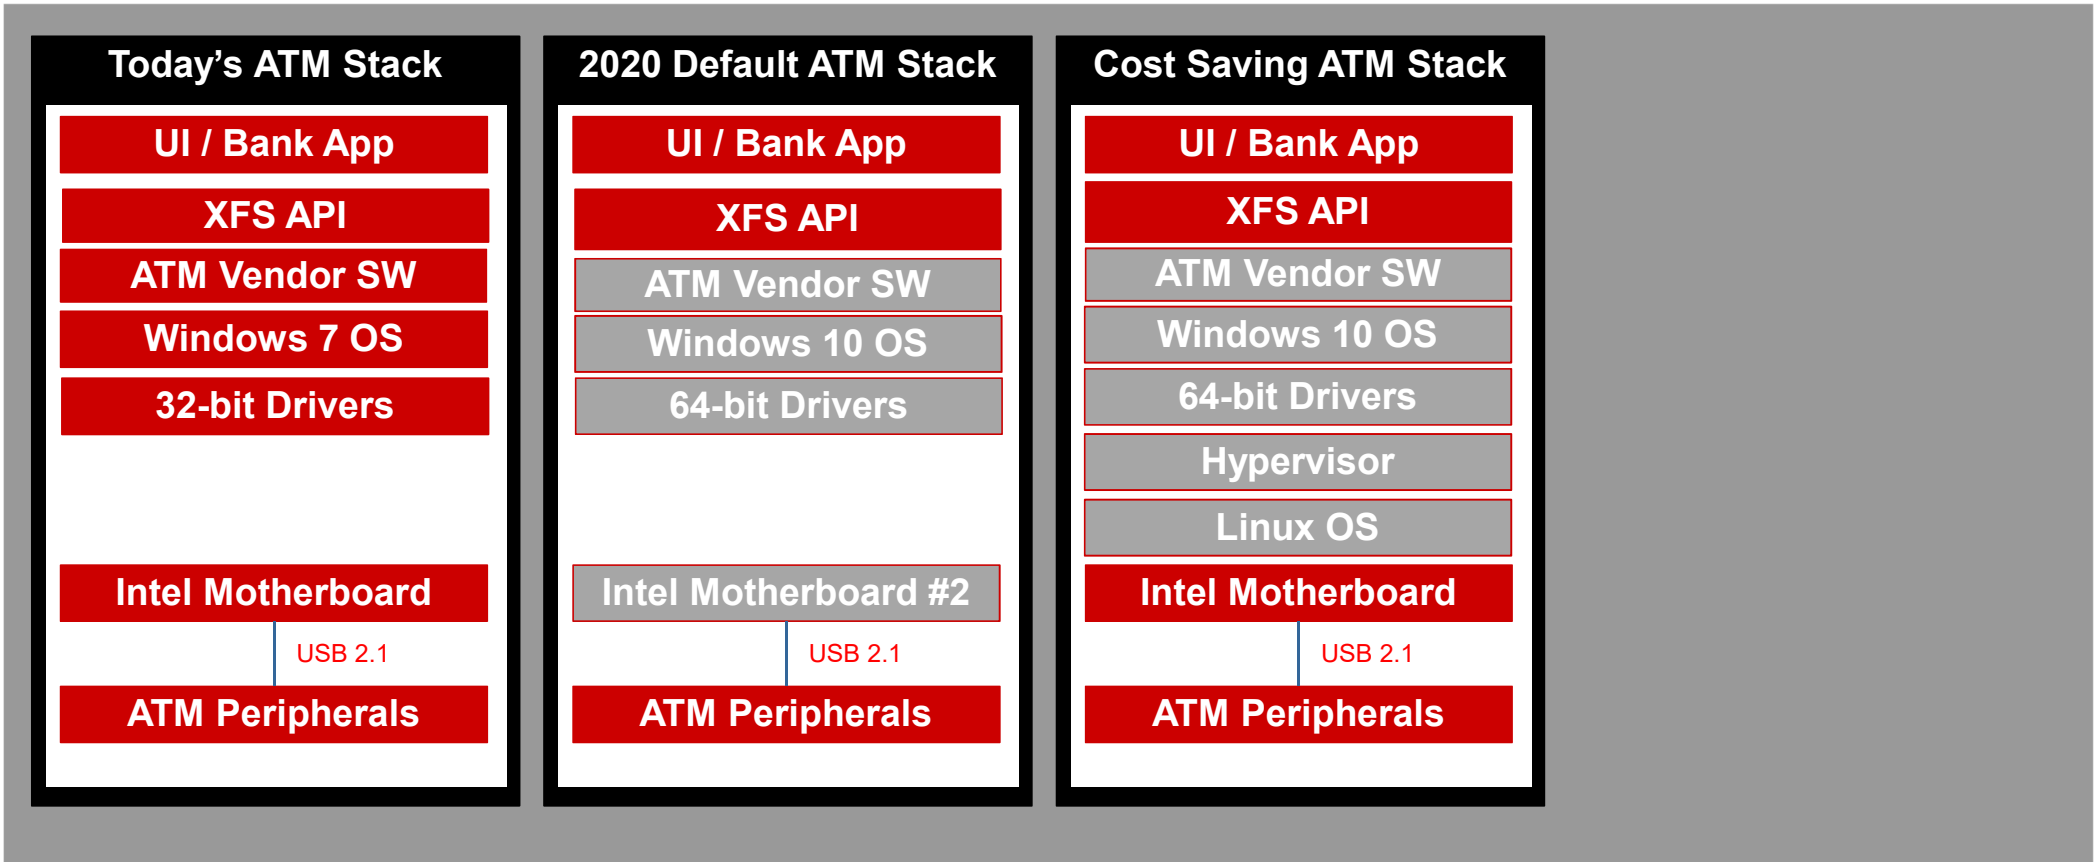

Short Term Architecture
