Increase non-gaming revenues with Dynamic Currency Conversion on your QuickJacks™ and ABMs.

Introducing DCC with CPS

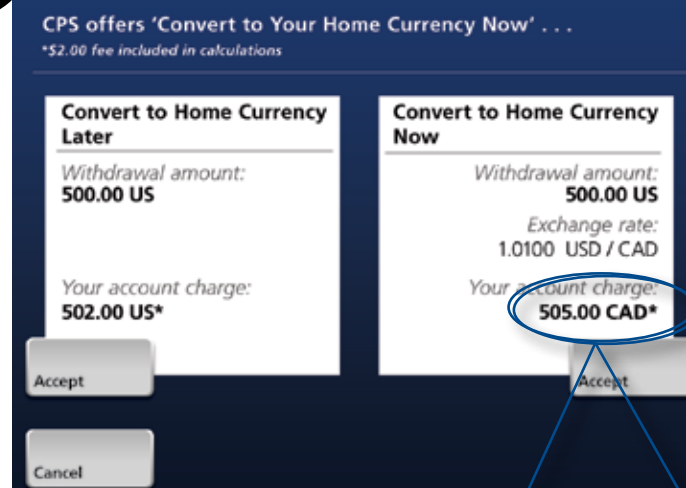

DCC - Dynamic Currency Conversion - allows you to capture revenue from every foreign exchange transaction involving international cards on your QuickJack™ and ABM network.

- Seamlessly add CPS to all of your ABM, QuickJack™ ABM or Cash Dispensing Machines at no charge or expense to you
- Earn new revenue on every international transaction
- Receive detailed and transparent transaction reporting with ongoing customer service
- Foreign exchange risk and transaction settlements managed by CPS
- Provide international cardholders with the instantaneous choice to convert to their home currency with real-time rates

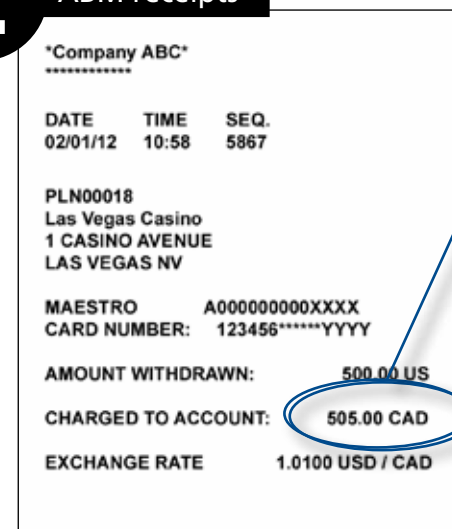

How DCC with CPS works:

1 Live foreign exchange choices on ABM screen

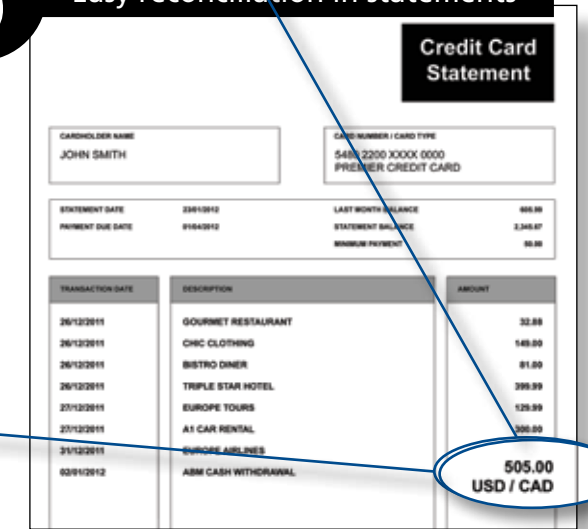

The cardholder is provided the choice to “convert to home currency now” with CPS providing a real time foreign exchange conversion rate.

2 ABM receipts

The ABM receipt displays the transaction details including the local currency, the foreign exchange conversion rate and the cardholder’s home currency.

3 Easy reconciliation in statements

The home currency amount on the ABM receipt matches the amount on the cardholder’s credit/debit billing statement.

Let CPS maximize foreign exchange opportunities for you

CPS now connects you with expertise in pricing, hedging and knowledge of the varying conditions in the foreign exchange market. Let us maximize foreign exchange opportunities through a new revenue stream – while providing a number of flexible pricing terms to meet your needs.

- Customizable Spreads (by basis point and/or by channel)
- Adjustable Spreads – enhancing revenue opportunities over time
- VIP Spreads – customizable for your most important customers

An innovative revenue opportunity from a gaming industry leader.

CPS is the leading supplier of self-serve, cash-handling kiosk systems for the gaming industry. With DCC, each of our ABM and QuickJack™ kiosks represents a new revenue opportunity.
