

In addition to all the benefits membership provides your business – top-notch educational opportunities, premier advocacy services, meaningful connections and industry visibility, news and vital resources that improve operational efficiencies, ATMIA also offers members the opportunity to serve on a variety of committees.

With a wide range of global committees and a regional Strategic Direction Committee – specifically designed for Asia Pacific members, ATMIA-sponsored committees offer members the opportunity to voice ideas and engage in discussions for the betterment of the industry. Each committee typically meets quarterly for one hour by conference call or webinar.

Asia Pacific Strategic Direction Committee

Formerly the Government Relations Committee, the Strategic Direction Committee serves as a forum for member organizations to discuss issues such as innovation, security and the future direction of the ATM. The committee also works together to tackle government regulation at the local and national levels and advocacy on behalf of the industry.
