

Ten Step Plan for Next Gen ATM Blueprint

1. Produce a formal architectural diagram of the blueprint for an API App model for ATMs
(Standards & Technical Sub-committee)
2. Study diagram to identify levels at which standards will be required for interoperability
(Standards & Technical Sub-committee)
3. Develop scope and nature of standard (s) for next gen ATM ecosystem
(Standards & Technical Sub-committee)
4. Produce global best practices for customer security education
(Security Sub-committee)
5. Establish advocacy fund for 2018 PR work
(PR & Comms Sub-committee)
6. Describe Business Value Propositions and Risks for Next Gen ATM Blueprint for each sector
(PR & Comms Sub-committee)
7. Define process & timeline for project work with full alignment to 2020 and 2023 roadmaps
(Governance Sub-committee)
8. All sub-committees to analyse impact of existing regulations and standards on blueprint
(All Sub-committees)
9. Rewrite ATMIA's Recommendations on ATM User Interface to align with blueprint
(Customer Interface Sub-committee)
10. Define requirements and impacts of five operating environments of ATMs on blueprint
(Customer Interface Sub-committee)
