THE FACTS ON SKIMMING

The race to prevent fraud is never-ending, and even as new solutions are implemented, work-arounds are being designed. That’s certainly been the case when it comes to card skimming at the ATM. Over the years, the bad guys have made their skimmers smaller, smarter and virtually undetectable. And even as EMV compliance makes its way across the United States and around the globe, skimming remains one of the financial industry’s most costly problems.

ActivEdge™ from Diebold Nixdorf is the world’s first skimming solution impenetrable to every known type of skimming device.

WHAT’S YOUR REASON FOR WAITING?

PROTECT YOUR ATMS WITH THE WORLD’S MOST SECURE ANTI-SKIMMING CARD READER. CONTACT US TODAY.

HOW IT WORKS:

1. ROTATE CARD 90°
2. INSERT CARD LONG-EDGE FIRST
3. A MOVING HEAD READS THE CARD INFO

We performed our due diligence by researching various products within the industry and determined from the security perspective that ActivEdge was the best long-term investment. By installing ActivEdge technology, Wescom demonstrated our commitment to safeguard our members’ accounts and keep their card data secure. We drove member adoption to this new technology seamlessly—even with the unique card insertion orientation—through communication, a card insert demo video, and a card insertion decal.

America Arevalo, Director, Electronic Services
Wescom Credit Union
Upgraded entire fleet – 79 ATMs – with the ActivEdge solution.

Dory Haworth, Director of ATM Operations, Denali Federal Credit Union
Third-largest credit union in Alaska: 50 ATMs were upgraded with ActivEdge.

We introduced internet banking to Alaska back in 1996, and we’ve continued to be leaders in financial technology solutions. Our ATM network is vast: we have terminals installed from Fairbanks, Alaska, to Kent, Washington, and we need to feel confident that they’re safe and protected. ActivEdge gives us—and our members—peace of mind.
