EPSurvey – Physical Verification
Real-time verification of ATMs - Site, Cash and Asset Audits

EPSTAR 3.0 – Successful case studies

Banks and
Auditors
Review
meetings

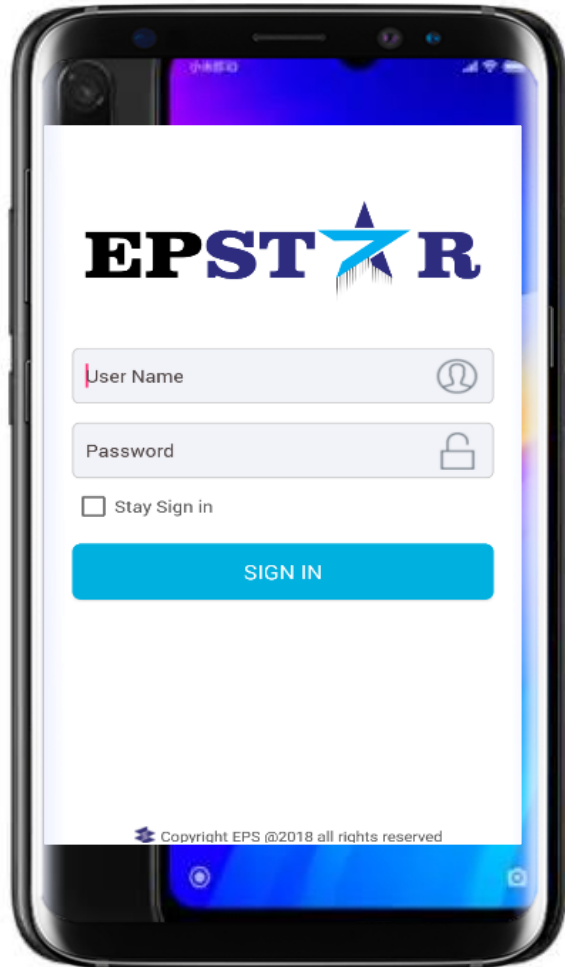

Alert on ATM
vandalism

- Dashboard view on ATM health check is available real-time basis across PAN India ATMs --- this is a “most impressive and differentiating factor” for EPS as per Bank Executives feedback which outshines us from other Competitors with messy spreadsheets; manual intervention and calculation

- EPSTAR – EPSolve helps to monitor, track, update and close incidents. In a Real-time scenario a Suspect tried to vandalize an ATM, promptly EPSTAR triggered an ATM fault incident, which was monitored by the respective State RM and prompt action was taken which resulted in quick Legal action

EPSTAR 3.0 – Benefits

Customer - Connect and Collaborate

Zero Cost; Uptime and Faults real-time Data availability;
