

Your Partner in Transaction Processing

Columbus Data Services (CDS) is one of the nation's largest ATM processors, providing financial institutions, ATM ISOs, and merchants with ATM driving and management services, as well as network gateway access services. CDS operates the ACI Postilion software for its core processing platform. Postilion software is recognized in the payments industry as a robust, high tech processing platform capable of supporting the latest in payments technology. At CDS, we know the "one size fits all" approach does not work for everyone. That's why we maintain a talented development staff to provide our clients with custom development work to best meet each customer's specific needs.

We support ATMs manufactured by all the leading hardware manufacturers, and our staff of experienced professionals is dedicated to helping our clients compete in the marketplace.

CDS Services Include:

- Terminal driving and connectivity to all leading PIN debit networks (Cirrus, NYCE, Plus, Pulse, Star, Exchange, AFFN, CU24, EBT, and more)
- Settlement, accounting, and reporting
- Dedicated tech support, monitoring, and dispatch
- Enable bitcoin purchases through LibertyX at your ATMs

WebTools ATM Management Portal

When you partner with CDS, you will gain access to our industry-leading, online web-based ATM management system, WebTools. With WebTools, you'll have many helpful features at your fingertips – such as:

- Anytime terminal setup, activation, and change management
- Monitoring tools including email and SMS text messaging of terminal status
- Cash management tools including cash forecasting and low-cash and out-of-cash alerts
- Customized merchant statements, reporting, and much more

From full outsourcing to comprehending the latest changes in the payments industry, you can count on CDS to provide the support you need to keep your business profitable.
