Everything you need to provide a seamless delivery of ATM products and services to your customers

While FIS has a robust ATM offering with full support for standard and advanced transaction sets, we continue to invest in our ATM product line. Our investment focal point is to create products that promote differentiation vs. your competition, operational efficiencies, reduce expenses, increase revenue and improve the consumer experience within your ATM network. ■

ATM

ATM Driving

While many may view ATM driving as a commodity business, FIS does not. We differentiate our offering via:

Provide a Superior Consumer Experience

Enhance the cardholder experience through differentiating functionality like FIS Cardless Cash[®], consumer selected bill-mix, PIN change and mixed deposit transactions.

Reduce Expenses

Reduce ATM management costs and onsite visits through remote solutions supported by self-sufficient ATM web functions and deposit automation services that minimize the number of trips required to the ATM to pull deposits.

Minimize ATM Downtime

Timely fault notifications by our automated device monitoring solution, drives customer satisfaction and ensures brand integrity.

Simplified Back-office Processing

Benefit from single-point settlement for all EFT network activity and streamline exception processing through one consolidated web GUI system for all EFT network activity.

ATM Driving

Integrated Breadth of Services

Your FIS ATM program is tightly integrated to our debit and prepaid card management systems, imaging systems, fraud solutions, transaction repository GUIs, as well as our NYCE EFT network to which connects debit cardholders to 500,000 ATMs globally and 2 million POS PIN debit locations nationwide.

Speed to Market

With our very strong relationships with all major ATM manufacturers, FIS is consistently an early adopter to certify the latest ATMs, components and software necessary to meet the increased focus on the consumer experience and delivery of additional functionality via the ATM channel.

A close-up photograph of an ATM keypad with a person's finger pressing one of the buttons. The image is overlaid with a green gradient.

Value-added Transactions, Services and Experiences

FIS considers withdrawals (including fast cash), balance inquiries, deposits (with or without an envelope) and transfer as part of a base transaction set that we would typically support for a full function machine. In addition, FIS can offer several value-added transactions, services and experiences, including:

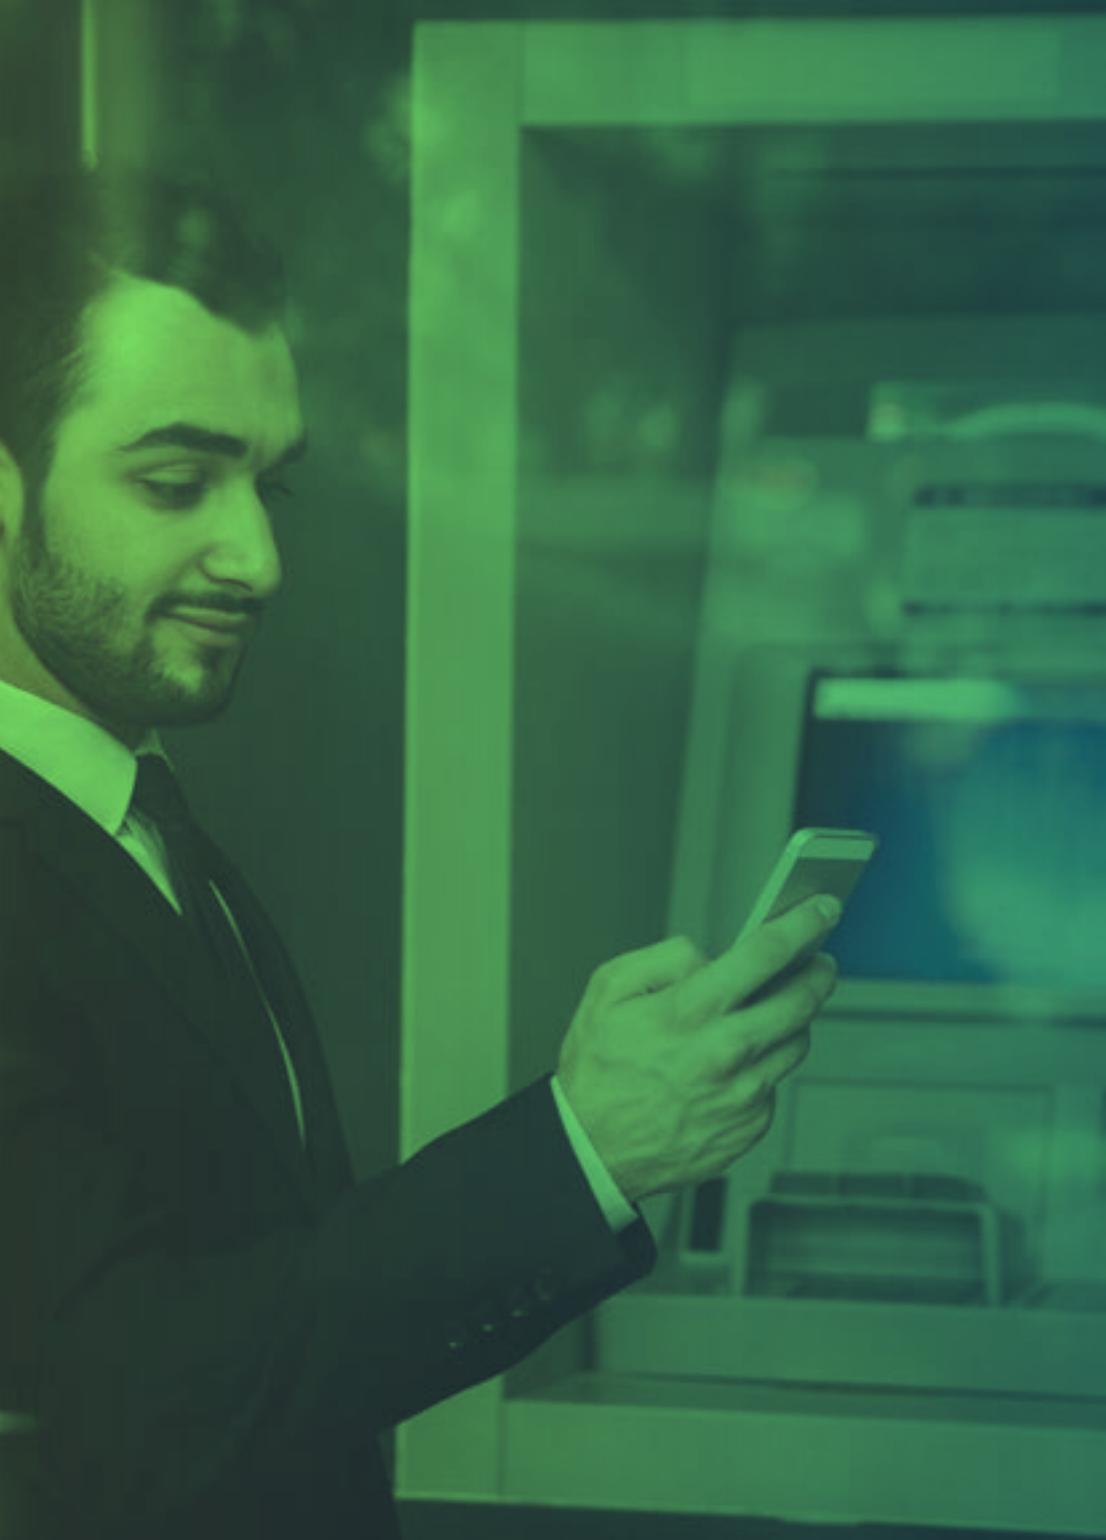

- ✔ **Consumer Selected Bill-Mix**
- ✔ **FIS Cardless Cash®**
- ✔ **PIN Change**
- ✔ **Mini-Statements**
- ✔ **Mixed Deposits**
- ✔ **Image Collection**
- ✔ **Transfer/Payments to Loan**
- ✔ **Non-Cash Dispensing (stamps)**
- ✔ **Multi-language Support**
- ✔ **Cardholder Preferences**

Self-service ATM web functions

Self-service ATM web functions enable additional advanced functionality which includes:

- ✔ Sending loads and ATM master keys remotely
- ✔ Onboarding ATM adds/changes/deletes to/from the FIS network
- ✔ Viewing the terminal and transaction data in real time
- ✔ Viewing a near real-time ATM health status
- ✔ Updating ATM surcharges and address data

FIS Strong Relationships

ATM Managed Services

FIS has partnered with NCR to offer ATM Managed Services. This fully-managed ATM offering combines the value of FIS and ATM manufacturer NCR, offering clients a comprehensive ATM package that can include purchasing the ATM device, ATM maintenance services, managed security services, cash forecasting and/or Cash-in Transit (CIT) management in addition to the ATM driving and ATM monitoring/support services you receive from FIS today

Certification and Testing

FIS has very strong relationships with all major manufacturers, including Diebold, NCR, Hyosung, GRG, Genmega, Triton, etc. We have the capability of certifying new ATMs, components and software, and continually do so in our ATM test labs. We work very closely with the ATM manufacturers to ensure we are certified on new products in advance of our clients' business needs.

ATM Monitoring

FIS ATM monitoring technology alerts you or your ATM service team of events that may adversely affect ATM performance. The timely notification of faults and a quick response by your ATM service team results in increased operational uptime of your ATM network.

**Remote monitoring is also available.
Benefits include:**

- ✓ **24/7 secure Web access to your ATM network**
- ✓ **Categorized graphical display of ATM trouble tickets**
- ✓ **Real-time ATM network status**
- ✓ **Immediate notification of communication outages**

ATM Communications Supported

FIS' flexible processing environment can work with a wide variety of telecommunications networks. Several telecommunication options are supported to best fit our client's business needs, including:

- ✓ **FIS Managed Network**
- ✓ **Customer Managed Network**
- ✓ **Native Dial**
- ✓ **Wireless/Cellular**
- ✓ **Secure VPN**

Mandate Support

FIS develops solutions to meet card association, EFT network and/or government mandates in advance of those mandates so you do not have to be concerned with compliance issues. Recent examples include Windows 7 Operation System end of life preparation, chip card (EMV) liability shifts and voice guidance in response to the ADA.

Everything You Need

Driving over 88,000 ATMs, you get a top third-party processor in the U.S. that is large enough to provide you all the ATM functionality you need while continuing to provide a personalized level of service not found with other processing alternatives.

**ADVANCING THE WAY THE WORLD
PAYS, BANKS AND INVESTS™**
